

# The HomeShare<sup>®</sup> Music System from Sony

Bring harmony into any home with wireless music.

Affordable and versatile, Sony's innovative HomeShare music system makes it easy for every customer to get clear, crisp, room-filling music into their home using their wireless home network without a messy tangle of cords and cables.

Setup is simple and the system is completely wireless and highly customizable, making it easy to stream music from a DLNA<sup>®</sup> compliant PC, HomeShare iPod<sup>®</sup>/iPhone<sup>®</sup> dock, HomeShare-compatible home theater system or Blu-ray Disc<sup>™</sup> player to anywhere in their home.

And your customers can use their iPhone, iPod touch<sup>®</sup> or iPad<sup>®</sup> to control it all<sup>1</sup>, whether they want to play music in one area of their home or to synchronize all their HomeShare speakers to play the same song at once with the Party Streaming<sup>™</sup> function (perfect for parties or moving room to room).

## System Setup

It only takes a few moments to begin enjoying wireless audio throughout a house over a wireless home network – setup is literally as easy as 1, 2, 3.

### Step 1

Insert CD-ROM into a computer and connect speaker to a router with supplied cable.

### Step 2

Follow simple on-screen instructions to configure the network.

### Step 3

Place speaker in house, access music and enjoy.

Start offering the HomeShare music system in your store today.

Visit [sony.com/DealerHomeShare](http://sony.com/DealerHomeShare) to watch an overview video, download HomeShare marketing assets and grab a downloadable PDF. You can also view HomeShare training modules on CyberScholar<sup>®</sup> at [CyberScholar.com/Sony](http://CyberScholar.com/Sony).

## Listen

To start, your customers will need a HomeShare® network speaker, available in three convenient sizes. Then, they can add additional speakers to expand the omni-directional HomeShare experience throughout their home.

### Large HomeShare Network Speaker

Perfect for larger areas of the house with four built-in speakers and a subwoofer.

SA-NS400

### Small HomeShare Network Speaker

A compact design perfect for more intimate areas like bedrooms and the kitchen.

SA-NS300

### NEW! Portable HomeShare Network Speaker

Completely portable and Apple AirPlay compatible; iTunes users rejoice!

SA-NS500

## Connect

HomeShare network speakers can connect over a wireless home network to an array of systems to play everything from your customers' music library including CDs, digital tracks<sup>2</sup> and internet-streamed music<sup>3</sup>.

### HomeShare Docks

Directly access music from most iPod®/iPhone® models, a DLNA® compliant PC or the internet<sup>3</sup> to enjoy superior sound quality.

### HomeShare Compatible Network Player

Connected to a network player, HomeShare speakers can be used to play your customers' favorite internet-streamed<sup>3</sup> or USB-stored<sup>2</sup> music.

NAS-SV10i

### HomeShare Compatible Blu-ray™ Systems and Players

Customers can simply insert their favorite CD, or stream internet music to any room from sources like Qriocity®, Pandora®, Slacker® and NPR.<sup>3</sup>

### Computer

By connecting their DLNA compliant computer to HomeShare speakers, customers can stream their entire digital music collection<sup>2</sup> throughout the house.

NAS-SV20i

## Control

Customers can use an iPhone, iPod touch®, iPad®<sup>1</sup> or RMN-U1 universal remote to control the playlist, send songs to specific speakers, adjust the volume, and more, to create the perfect soundtrack for every moment, and the perfect ambiance for every occasion.

### Mobile Control

A free app transforms your customers' iPhone, iPod touch or iPad into a convenient remote control<sup>1</sup> that manages music from virtually any room in the house.

### Universal Remote

A brilliant, 5-inch touch screen grants total access to the HomeShare wireless audio system in this elegant, easy-to-use remote control.
