- Accommodates up to 6 Audio/Video components
- Built-in cable management
- Solid wood case construction for strength
- Easy to assemble (Phillips head screw driver required)
- Smart design fits any décor

Features

Universal Fit

The PROFORMA™ line was specifically designed to fit today's most popular flat TV's screen sizes. The mounting accessories were designed and UL tested to support more than the weight of a 65" flat screen TV.

Innovative 2-in-1 design

The 2-in-1 design allows for setup flexibility when placing a TV on the stand. Option one is the traditional tabletop TV placement on a supplied tempered glass shelf. Option 2 provides a swiveling mounting arm and bracket for an integrated look. Both options help the newest high tech TV designs smoothly match a wide range of home interior styles.

Supports multiple components

The glass middle shelf supports up to 40lbs of weight while the bottom shelf supports 70lbs, which is more than enough for the various audio/video components that most consumers use. These devices include, Blu-ray Disc™ players, cable boxes, gaming systems, AV receivers, multidisc changers, etc.

Built-in cable management

With the built-in cable management system, your cables are secured to the back of the rear panel –out of sight. This allows for a clean look for typically messy audio video system wiring.

Solid wood case construction

The solid wood case construction makes the PROFORMA™ bases secure and strong. The elegant finishes will retain their luster based on meticulous multi-step finishing processes.
